

All animals need:

food

water

play

love

But, before and after touching animals, or their bowls or toys, always:

wash your hands with soap!

COVID-19 and our animals

There is **no evidence** that dogs or cats can spread COVID-19 to people.

But if you feel sick:

- Keep your animals out of your house
- Ask family or friends to help look after your animals
- Stay away from other people and animals

If you are worried about your animals, talk to your vet or AMRRIC (08 8948 1768)

Regularly washing your hands with soap helps to stop COVID-19
