

# TICK PREVENTION:

THE BEST PROTECTION FOR OUR PETS AGAINST TICKS IS TO TREAT THEM WITH A REGISTERED TICK MEDICINE.

The following tips may also help to reduce ticks around your home.

## OTHER WAYS TO REDUCE TICKS AT HOME

### Cut the grass

Ticks can hide in long grass as this gives them moisture and shade. Keeping it short can help keep them out!

### Plant plants that ticks don't like

Some plants such as garlic, rosemary and lemongrass help to keep ticks away.

### Wash dog beds

Washing dog beds helps remove ticks from the bed, especially when they are washed in a machine.

### Keep your dog out of bushy areas

I'm hiding in here

### Call a professional to spray for ticks at home

Ask housing to assist by spraying your home for pests.
